

## Who we are

AECAR was born in 1978. In a few years, the company established itself as one of the leaders in the production of high-precision precious metal electrical contacts for any kind of electrical and electromechanical devices, sold in several industrial markets.

## Products

- Precious metal electrical contact rivets
- Stamped electrical contacts
- Riveted electrical contacts
- Electrowelded by wire or microprofile electrical contacts
- Braze-welded electrical contacts

## AECAR S.r.l.

Viale dell'Artigianato 52-54

## Production

AECAR is divided into three different production departments. Here, stamping and stamping-bending operations are carried out every day at medium/high speed, together with the welding processes of wires and micro-profiles in precious metals, hot and cold heading of precious and non-ferrous metal wires, automatic and manual riveting and both electrical and induction braze-welding.

## Services

- precious metal skill  
AECAR has developed and consolidated its expertise in the production and processing of precious metals.
- supply-chain  
AECAR employs both precious and non-ferrous metals from certified and industry-leading suppliers.
- co-design  
AECAR is able to assist its customers since the initial phase of the project, including: the assistance for the design of equipment; the choice of materials and any galvanic treatment.
