

# aerocom

*il Vs. partner per la posta pneumatica*

## aerocom GCT Srl

ASSOLOMBARDA

Filiera Life Sciences

### Who we are

With a German HQ, aerocom in Italy was founded in 1983 and immediately conquered part of the market in the field of pneumatic conveying systems.

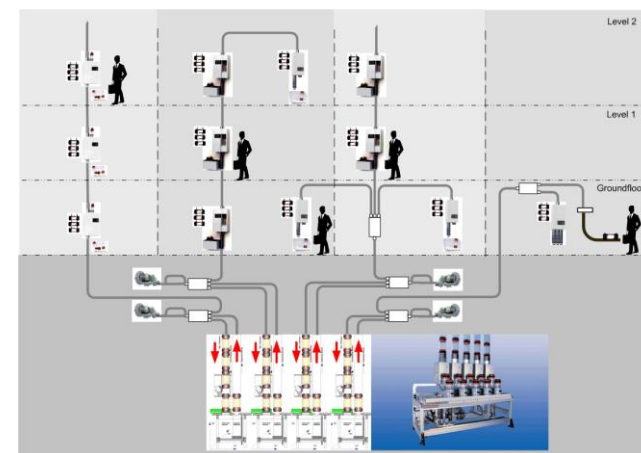

More than 1000 aerocom systems are currently operating in our country, in many different realities (offices, logistic warehouses, cinemas, refineries, steelworks, hospitals, supermarkets, petrol stations, banks, motorway toll booths, public administration offices, hotels, pharmacies, etc.).

Our proven experience has made aerocom the reference pneumatic tube manufacturer worldwide, recognized in every sector.

### What we do

Our pneumatic post systems, with ergonomic and attractively designed sending/receiving stations, are the perfect connection between the automatic warehouse and the sales cash area of a pharmacy or represent the fastest, most efficient and hygienic solution for the transport of biological laboratory samples.
