

Aquila Clean Energy is Aquila Capital's clean energy platform in Europe. Aquila Clean Energy develops, realizes and operates clean energy assets in the technologies solar, wind, hydropower and battery storage.

Aquila Clean Energy thereby acts as an agent of change for the objectives of the energy transition and achieving a net-zero carbon economy.

Due to the scale of its operation, Aquila Clean Energy is positioned to make a significant impact in advancing these objectives.

With a local approach and through local teams of experts, Aquila Clean Energy initiates, develops, realizes and operates what we identify as essential assets along the entire value chain and lifetime. Aquila Clean Energy has built a permanent presence in 7 countries with 140 employees, believing that local, on-site management teams are key to the company's operations.

Aquila Clean Energy entered the renewable energy Italian market in late 2020. Currently, the company manages in Italy a portfolio of around 70 projects with a total capacity in excess of 2.2 GW under development and construction.
