Bandyer
Linking Revolution

Who we are

Bandyer's technology, based on WebRTC, allows to integrate a versatile, simple and immediate communication channel to any company system. You can access to the Bandyer technology solution from any of your corporate device (mobile phone, tablet and pc) and even from wearable devices like the Google Glass.

A Remote Assistant Solution

Bandyer offers an advanced Remote Assistant Solution with all the latest features such as live pointer, chat, screen capture, gallery, virtual whiteboard, recording and file sharing.
The use of Google Glass allows to operate hands free and enjoy the most immersive, advanced and effective remote assistant experience.
