

Who we are:

We are an innovative start-up focused on the development of advanced digital technologies aimed at connecting the various operators of the B2B freight mobility supply chain through efficient, predictive, and sustainable procedures and processes.

Our product description:

The e-platform integrated a network that We offer an all-in-one smart logistics platform that connects trucks and loads closest to each other, providing a variety of services for B2B freight efficiency and sustainability. The e-platform, already integrated with a network of 16,000 companies (both shippers and carriers), now combines advanced technologies with a broad network of operators through a unique intuitive interface.
