

Boston Scientific is providing innovative medical solutions to patients and transforming lives around the globe:

- We have commercial representation in more than 123 countries
- 35,000 employees span 179 sites worldwide including 38 manufacturing centers worldwide
- 42% of net sales in 2019 were from outside the U.S.
- World headquarters in Marlborough, Massachusetts with regional headquarters in Europe and Asia Pacific
- Our **Institute for Advancing Science** locations around the world offer healthcare professionals hands-on, multidisciplinary training programs for our products and procedures
- **ADVANTICS™ Solutions** designed to drive efficiencies and sustainable results through productivity. To our core advisory capabilities, we add therapy solutions and digital accelerators.

We focus on addressing some of the toughest problems in healthcare:

- Boston Scientific invests its time, resources and energy into creating and developing solutions that matter most to clinicians, hospitals and patients
- Our products treat a range of complex diseases and conditions, including:
 - Neurological
 - Cardiovascular
 - Respiratory
 - Urology and pelvic health
 - Digestive diseases

Boston Scientific Italy
