

DSTech s.r.l.

Solid ideas for a liquid world

Who we are

Dst represents the intersection among Design, Strategy and Technology, to create digital experiences that become success stories.

The strength of **Dst** is to have internally all the necessary knowledge needed for the development and growth of a digital project: from Innovation to Service Design, from Consulting to Technological Development, from Marketing to Customer Service.

Service description

Academy: Our highly skilled teachers on digital world topics train future proof professionals.

Consulting: we fill the resource gap customers may have in the implementation of complex digital transformation

Design: we imagine and design user-centered solutions in which every aesthetic, functional and communicative detail is taken care of in order to align creativity and business needs.

Technology: We provide a multi-sector expertise together with Agile and Scrum methodologies to develop Cloud, Web, Mobile, e-Commerce, CMS and DMS platforms.

Digital Marketing: We use an adaptive approach to create original and customized sales paths, designed to be digital experiences.

Customer & Service Management: we provide application support on legacy platforms and system support for the configuration of physical and cloud networks, servers, software, portals and backend

Innovation: we guides companies to identify calls for tenders and funding to support growth and innovation
