

# DSTech s.r.l.

Solid ideas for a liquid world

## Who we are

**Dst** represents the intersection among Design, Strategy and Technology, to create digital experiences that become success stories. The strength of **Dst** is to have internally all the necessary knowledge needed for the development and growth of a digital project: from Innovation to Service Design, from Consulting to Technological Development, from Marketing to Customer Service.

## Service description

**Academy:** Our highly skilled teachers on digital world topics train future proof professionals.

**Consulting:** we fill the resource gap customers may have in the implementation of complex digital transformation

**Design:** we imagine and design user-centered solutions in which every aesthetic, functional and communicative detail is taken care of in order to align creativity and business needs.

**Technology:** We provide a multi-sector expertise together with Agile and Scrum methodologies to develop Cloud, Web, Mobile, e-Commerce, CMS and DMS platforms.

**Digital Marketing:** We use an adaptive approach to create original and customized sales paths, designed to be digital experiences.

**Customer & Service Management:** we provide application support on legacy platforms and system support for the configuration of physical and cloud networks, servers, software, portals and backend

**Innovation:** we guides companies to identify calls for tenders and funding to support growth and innovation
