

IDROAMBIENTE Srl

CCTV INSPECTION AND
TRENCHLESS PIPE RENOVATION

ASSOLOMBARDA
Confindustria Milano Monza e Brianza

Power, Oil & Gas Network

Who we are

Established in 1991, we have continuously increased our range of know-how and trenchless services in the robotic inspection and in the structural and hydraulic renovation of underground networks for gas, water, oil and sewerage pipes.

We operate exclusively with trenchless technologies, for which we hold three international patents, as well as numerous qualifications and certifications.

Product description

- CCTV and 3D internal robotized inspection of pipes.
- HP hydro blasting industrial pipelines and water supply.
- Structural and hydraulic trenchless relining of pressure pipes for water, gas, oil pipeline.
- Structural and hydraulic trenchless renovation of sewer and drainage pipes.
- Structural and hydraulic trenchless renovation of large sewer and water systems.
- Repairs from inside of joints for water pipes.
- Complete planning and execution of activities.
- Design of trenchless works for third parties.
- Civil and industrial hydraulic pipe systems testing.
- Search for leaks on underground and / or submerged pipelines.
- Interactive digital mapping of underground networks
