## Green finishing treatments on aluminum and light alloys

### (Who we are)

LEBA1974 was born from the experience gained in 50 years of activity in the field of surface finishing treatments.

We deal with finishing treatments on aluminum and light alloys with sustainability at the center

### (Product description)

NaluCoat® is a nano-composite treatment from the patent of LEBA1974 srl.

A revolutionary treatment that enhances the natural beauty of aluminum and light alloys while operating in full respect of the ecosystem. An aesthetic-functional permanent finishing treatment, with a very low thickness whose main element is silicon dioxide (SiO<sub>2</sub>), which allows to obtain completely recyclable and recoverable elements.
