Product description

Advisory Services
We bring a deep understanding of business processes combined with over four decades of experience in building complex IT systems to enable you to align your IT operations with business objectives.

Application Development and Management
Our comprehensive portfolio of Application Development and Management services combine technical and business expertise with client insight to develop tailored solutions to optimize value for your business.

Enterprise Application Services
Whether your project is an enterprise-wide implementation, upgrade, rollout, or managed services deployment, we can help minimize cost and risk while maximizing efficiencies and value to your business.

Business Intelligence and Analytics
Businesses today must be able to glean insight and understand the value from every purchase, Tweet, and customer care interaction. We can help you unlock this business value from mountains of data.

Infrastructure Services
Our Infrastructure Services can help you find innovative ways to reduce infrastructure costs so you can direct more of your technology expenditures toward strategic initiatives.

Outsourcing Services
Through an optimal blend of onsite, nearshore, and offshore resources, our cost-effective delivery model balances global reach with local accountability and delivery excellence.

SAP Solutions
With more than 6,000 SAP experts worldwide; 25 years of experience in implementing, operating and optimizing SAP applications, NTT DATA brings excellence in your SAP business you can count on.

Oracle Solutions
As an Oracle Certified Partner, NTT DATA has a wealth of experience acquired through many years of Oracle project execution. We blend business and industry insight with technology expertise to deliver innovative and scalable Oracle solutions.

Cloud Solutions
NTT DATA has the deep expertise to demystify cloud computing for you and helps clients navigate the cloud landscape, implement the most appropriate cloud strategies for fastest results, and provide full-stack cloud applications and infrastructure management with a focus on ease of use and customer service.

Big Data Solutions
NTT DATA offers total Big Data analytics solutions which help customers getting new insights and create value from their data.

M2M Solutions
we strive to develop end-to-end underlining technologies and solutions from applications, business intelligence, cloud computing platforms to hardware devices including sensors.

Application Development Technologies
We can help you increase the quality and reduce the development time of your customized applications by using our TERASOLUNA automation tools.
