

PIBER GROUP

Innovation and Sustainability in Food Packaging

ASSOLOMBARDA
Filiera Largo Consumo

Who we are

Piber Group offer innovative and complete solutions for the food packaging and can help the customer step by step in the development of a new product, from the design to the packing details and to the accomplishment of a food packing production line.

The history of the Piber Group starts in Italy, thanks to three founding brothers. It is the amazing adventure of a family that was able to turn-around a small craft-based company into Italy's most important group producing injection moulded plastic containers for food use.
