

Riso Scotti SpA

Dal 1860 diamo più valore al riso

ASSOLOMBARDA
Filiera Largo Consumo

Who we are

Since 1860, Riso Scotti has represented a history of tradition, linked to one of the oldest and most widespread foods; today sets the goal of looking at innovation, including social innovation, of taste, habits and customs, always in order to better interpret the extraordinary resource that rice is and decline it in contemporary proposals, suitable for even very different palates.

The presence of the brand and products in over 80 countries around the world requires a profound knowledge of habits, needs, and an ability to combine taste, goodness and health in a truly global diet.

A fundamental ingredient of this evolution is the extreme attention to sustainability not only of the product, but also of the processes, relationships and actions.

Our production

From an artisan rice mill, through six generations, Riso Scotti has transformed into a European food Group capable of offering rice at 360°, also using it as an ingredient: risottos, biscuits, sweet and savory snacks, baked goods, even gluten-free and lactose-free, as well as vegetable drinks and condiments. With 35% of turnover developed abroad and production concentrated mainly in Italy, the Company has established itself as a point of reference for the world of rice, combining continuous technological and process innovation with a circular economy model «zero wast» which valorises the 100% processed raw material, favoring co-energy production, aimed at self-sufficiency and reducing emissions.
