COMPLIANCE AND EMBEDDED SYSTEMS SERVICES

Skytechnology provides compliance and embedded systems services to the automotive industry and develops tools and methods cooperating with market leader companies, worldwide universities and research centers.

We support both OEMs and Tier 1 and Tier 2 Suppliers, with experienced Project Managers, Hardware and Software Architects, Designers and Developers, Testers and Validators and Functional Safety Assessors.

Quality and safety-related services are targeting both Processes and Products.

Compliance for the international standards (ISO 26262, A-SPICE, CMMI)

Embedded Systems services address ECU, body electronics, infotainment and telematics

Quality and safety-related services are targeting both Processes and Products.
