

Sparx Logistics

The best kept secret in global logistics

ASSOLOMBARDA
Filiera Agroalimentare

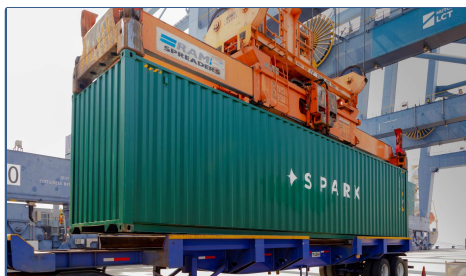

(Who we are)

SPARX logistics was established in 2014, as the legacy enterprise of a traditional freight forwarder founded in 1974. We began with the philosophy of gathering the best and brightest minds in the global logistics industry to provide our customers with cutting edge systems and superior service. Sparx has grown to over 50 offices in a dozen countries and counting. We are very selective about which markets we enter, preferring to keep our overhead low and our staffing lean to give us the flexibility and agility our customers demand.
