SANDVIK ITALIA SPA

We set the industry standards

Who we are

Sandvik is a world-leading manufacturer of advanced stainless steels and special alloys for the most demanding industries. The offering covers a large variety of product forms, such as tube, pipe, wire, strip and metal powder as well as products for industrial heating.

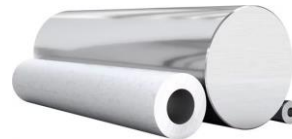

Hydraulic tubes and instrumentation tubes in a comprehensive range of corrosion-resistant stainless steels and nickel alloys.

Seamless stainless steel tubing developed for gasoline direct injection (GDI) and compressed natural gas (CNG) fuel systems.

Coiled tubing.

An extensive range of stainless bar and hollow bar for machining.
