

<b>Company name</b>	<a href="#"><u>Zhuhai Unitech Power Technology Co., Ltd.</u></a>	<b>COMPANY PROFILE</b>
<b>Sector</b>	Manufacturing machinery, device and equipment	<p>Zhuhai Unitech Power Technology Co., Ltd. is a high-tech enterprise that specializes in automated electric power systems and the development, manufacture, sales and engineering service for electrical safety products. It has been identified as a key software enterprise under state planning, a key high and new tech enterprise under the National Torch Program and a backbone enterprise in the base of the software industry under the National Torch Program. The company has invented the first-ever microcomputer mis-operation prevention locking system and won the reputation from customers with its excellent performance, reliable operation as well as thoughtful service. Unitech has focused on innovation over the past 30 years, and has now achieved four major product series, namely mis-operation prevention locking system and safety control, electric power automation, intelligent power distribution, as well as auxiliary system, which are applied in areas of electric power, petrochemicals, metallurgy, coal, and rail transport. The company has been maintaining over 50 percent of market share in the core product market. The company possesses a science and technology park occupying 60,000 square metres, with a staff of currently over one thousand people and a total asset of 1 billion RMB. The products of Unitech can be found in over 31,000 substations and power plants distributed in thirty-one provinces, cities and autonomous regions of China and are spread over ten other countries, including the USA, Malaysia and Indonesia. Unitech's products are also applied in several key national projects, such as electric power stabilization and concealment works for the Olympics, hub engineering for the Three Gorges Water Conservancy, substations for the World Expo, and power transmission from the west to the east. Unitech will continue to implement the "quality strategy" and "internationalization strategy", constantly engage in management optimization, attract top talents, and never stop creating value for clients, hence becoming a first-class supplier of electric power automation and power safety solutions.</p>
